Family members can complete a circle through the large living and family room of the four-bedroom model without encountering a single wall. This open floor plan, perfect for entertaining and family gatherings, is also reflected in the well-designed kitchen with breakfast nook and adjoining family room that overlooks your private garden. A formal dining room is also adjacent to the kitchen. The second floor includes a large master bedroom with walk-in closet and bath with separate vanities and three additional bedrooms that share a hall bath plus a loft. However, if a large loft is required the fourth bedroom can be opened and the hall bath repositioned and enclosed as a bath in the smaller loft space.
